

## **Polymorphism in molecular crystals – how much have we learned?**

Roger J. Davey

Molecular Materials Centre, University of Manchester, M 60 1QD, UK.

Research on polymorphs and the phenomenon of polymorphism has been going on since the middle of the 19<sup>th</sup> century. I am wondering, in this talk, how much more of it we need and, if we need more, what will be our goals. Perhaps we know it all. I'll be visiting a few old friends – Wohler and Leibig, Joel Bernstein, Walter McCrone as well as bringing in my crystal ball.
